DETAILED ACTION

1. The claims 1-42 are pending in the instant office action.

Restriction

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-6, drawn to a method of activating protein by protein refolding using Zeolite.

Group II, claim 7-⁸~~11~~, drawn to a method of producing active protein using Zeolite.

Group III, claims 9-20, drawn to protein refolding kit comprising zeolite and other materials.

Group IV, claims 21-30, drawn to protein refolding agents comprising zeolite, surfactants, buffer etc.

Group V, claims 31-42, drawn to protein refolding molding comprising zeolite and substance that support zeolite.

3. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature of Group I-II is method steps and although they use same product in their method steps they produce different results.

The technical feature of Group III- V is products (zeolite plus other compounds) and each group involves different products of unique functionality and utility, which do not share the same technical feature.

Furthermore, the only technical feature linking group I-V appears to be that they all relate to refolding protein using zeolite. The protein refolding by zeolite of group 1 does not constitute a "special technical feature" as defined by PCT Rule 13.2, because it does not claim a feature which defines a contribution over the prior art as a protein refolding within Group I is taught by the prior art such as Dong et al. (PhD Thesis, 2002, Drexel University, Philadelphia, PA USA)

4. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
